

VIKING POOLS 20-YEAR SURFACE WARRANTY

In 1991, Viking Pools introduced its Crystite® finishes to the North American market. At that time, no other US manufacturer was offering any other colors except White and Light Blue. In fact, up until about four years ago (2006) almost no other manufacturer producing pools in the United States offered anything but White and Light Blue.

In the nineteen (19) years since the introduction of Crystite®, Viking Pools has manufactured, and our dealer base has installed, over 40,000 Crystite® swimming pools. The performance of the Crystite® finish has been outstanding relative to fading and durability.

Because of that exceptional performance over the past 19 years and the additional accelerated weather testing that has been performed to ASTM standards, Viking Pools offers a 20-Year surface warranty on all of its Crystite® and Diamond Series™ fiberglass composite swimming pools, to complement the lifetime structural warranty.

Viking's Crystite® and Diamond Series™ finishes are a complex formulation of layered gel coats, colored flakes, sparkles and colored resins. The specific formulations create an available color palette with actual three-dimensional depth which transfers more light and color back into the pool water than other colored finishes.

CRYSTITE® FINISHES

Diamond SERIES™

As the largest manufacturer of fiberglass composite swimming pools in North America, Viking has produced more colored fiberglass composite pools than all other US manufacturers combined. You can enjoy peace of mind in your backyard knowing that your product is backed by the industry leading 20-year surface* and Lifetime structural warranties.

*20 year surface warranty started March 2010 and does not cover pools produced prior to that date
